CONTENTS

Number 1

	i	Editorial—A tribute to Robert Maxwell M.C.
J. L. Chaboche and P. M. Lesne	1	A non-linear continuous fatigue damage model
J. Heerens, A. Cornec and K.-H. Schwalbe	19	Results of a round robin on stretch zone width determination
B. K. Neale and E. K. Priddle	31	On fatigue crack growth and stable tearing
R. J. Allen, G. S. Booth and T. Jutla	45	A review of fatigue crack growth characterisation by linear elastic fracture mechanics (LEFM). Part I—principles and methods of data generation
	I	Information on Conferences/Seminars
	III	Software Survey Section

Number 2

R. J. Allen, G. S. Booth and T. Jutla	71	A review of fatigue crack growth characterisation by linear elastic fracture mechanics (LEFM). Part II—advisory documents and applications within national standards
C. S. Shin and R. A. Smith	109	Fatigue crack growth behaviour of a zinc–aluminium alloy at high homologous temperatures
V. T. Troshchenko, A. V. Prokopenko and V. N. Torgov	123	Surface cracks and the fatigue limit of metals
J. Congleton and T. P. Wilks	139	The air fatigue and corrosion fatigue of a 13%Cr turbine blade steel
	I	Information on Conferences/Seminars
	III	Software Survey Section
	VII	New Patents Section

Number 3

Ali Fatemi and Darrell F. Socie	149	A critical plane approach to multiaxial fatigue damage including out-of-phase loading
T. S. Gross and D. Mendelsohn	167	An analysis of frictional effects on cylindrical mode III fatigue crack propagation specimens
T. S. Gross, S. Bose and L. Zhong	179	Frictional effects on fatigue crack growth in β-annealed Ti–6Al–4V
R. C. Rice and R. Rungta	189	Modelling of embedded fatigue cracks in railroad rails
K. J. Nix, N. Knee, T. C. Lindley and G. G. Chell	205	An investigation of fatigue crack growth in a ductile material at high growth rates
M. Abo-Hamd, M. El Haddad and H. Abdel Raouf	221	Experimental fatigue evaluation of externally welded box girders
V. M. Kumar and N. K. Gupta	231	The effect of prior fatigue cycling on tensile properties of copper and aluminium wires
	I	Information on Conferences/Seminars
	III	Software Survey Section
	VII	New Patents

Number 4

F. H. Davis and W. J. Plumbridge	241	Magnetostriction effects in crack length measurements
S. Dedovic, A. Bakker and D. G. H. Latzko	251	A numerical study on global and local parameters controlling fracture in the brittle–ductile transition temperature region
T. Guennouni and D. Francois	267	Influence of the pore morphology and secondary cavities on the plastic behaviour of porous materials

F. Rezai-Aria, M. François and L. Rémy — 277 — Thermal fatigue of MAR-M509 superalloy —I. The influence of specimen geometry

F. Rezai-Aria, B. Dambrine and L. Rémy — 291 — Thermal fatigue of MAR-M509 superalloy —II. Evaluation of life prediction models

W. A. Herman, R. W. Hertzberg and R. Jaccard — 303 — A simplified laboratory approach for the prediction of short crack behaviour in engineering structures

I — Information on Conferences/Seminars

III — Software Survey Section

Number 5

J. R. Yates and K. J. Miller — 321 — A torsion-bending loading frame for a uniaxial fatigue test machine

Keiro Tokaji, Takeshi Ogawa and Shuji Osako — 331 — The growth of microstructurally small fatigue cracks in a ferritic–pearlitic steel

Y. Akiniwa, K. Tanaka and N. Taniguchi — 343 — Propagation and closure of short fatigue cracks at notches under compressive mean stresses

D. N. Gladwin, D. A. Miller, G. J. Neate and R. H. Priest — 355 — Creep, fatigue and creep-fatigue crack growth rates in parent and simulated HAZ type 321 stainless steel

D. S. Wood, J. Wynn, C. Austin and J. G. Green — 371 — A ductility exhaustion evaluation of some long term creep/fatigue tests on austenitic steel

A. Navarro and E. R. de los Rios — 383 — A microstructurally-short fatigue crack growth equation

A. Plumtree and J.-O. Nilsson — 397 — High temperature fatigue damage in three austenitic alloys

I — Information on Conferences/Seminars

III — Software Survey Section

VII — New Patents

Number 6

K.-H. Schwalbe, B. K. Neale and T. Ingham	409	Draft EGF recommendations for determining the fracture resistance of ductile materials: EGF Procedure EGF P1-87D
A. G. Mamalis, G. N. Gioftsidis and W. Johnson	421	Energy distribution and associated fracture phenomena when explosively loading paraboloidal-ended Perspex rods embedded in lead and air
J-B. Vogt, G. Degallaix and J. Foct	435	Cyclic mechanical behavior and microstructure of a 12Cr–Mo–V martensitic stainless steel
D. P. Rooke and P. R. Edwards	447	Waveforms in fretting fatigue
K. Bethge, D. Munz and H. Stamm	467	Growth of semi-elliptical surface cracks in ferritic steel plates under cyclic thermal shock loading
C. E. Price	483	The progression of bending fatigue in nickel
C. E. Price and G. W. Henderson	493	The progression of bending fatigue in Monel K500
C. E. Price and N. R. Houghton	501	The progression of bending fatigue in Inconel 625
	I	Information on Conferences/Seminars
	III	Software Survey Section
	VII	New Patents
